Dr. Andrew Noymer

All Things COVID-19

How we got here

Predictions for the future

Preparing for a future with COVID

Is there any reason to be optimistic?

Dr. Andrew Noymer
Epidemiologist, Population Health Scientist,
Associate Professor in Public Health at UCI

Monday, February 21, 2022

1:50 Join Zoom

2:00 - 3:30 pm - Zoom Presentation*
includes Question & Answer Period

Please join **Dr. Andrew Noymer, an Associate Professor in Population Health and Disease Prevention, Public Health at the University of California, Irvine**, a much sought after COVID-19 expert being quoted and interviewed by news outlets across the nation including *The Atlantic*, *CNN.com*, *LA Times*, *Newsday*, and the *New York Times*. Dr. Noymer will present his updates on his research, where we are now, predictions for the future, and how to prepare for a future with COVID-19. He will answer the question, “Is there any reason to be optimistic?”

Andrew Noymer, an epidemiologist, and population health scientist is an associate professor in the Department of Population Health and Disease Prevention at UCI. Professor Noymer holds a PhD in sociology from Berkeley, where he was also an NIA and NICHD trainee in demography, an MSc in medical demography from the London School of Hygiene & Tropical Medicine, and an BA in biology from Harvard University.

A specialist in infectious disease mortality, Prof. Noymer has closely studied prior modern influenza pandemics (2009, 1968, 1957, and the most severe, 1918) from a demographic, epidemiological, and social perspective. The coronavirus pandemic is the signature global health event of the early 21st century, and understanding it requires multiple viewpoints.

Prof Noymer is active on Twitter ([@AndrewNoymer](https://twitter.com/AndrewNoymer)) providing public information on COVID-19. He predicted the severe outcomes of the coronavirus pandemic last January.
